

VeriTracks™

Stopping crime
in its tracks

Why VeriTracks™?

- > Reduce recidivism
- > Prevent crimes through behavior modification
- > Exclude suspects not at or near the scene of a crime
- > Establish geographic zone "inclusion and exclusion" areas
- > Provide crime mapping and analysis tools across jurisdictional boundaries
- > Enhance effectiveness and efficiency of law enforcement and corrections via actionable information
- > Provide sentencing alternatives for effective prison and jail capacity management

Satellite Tracking of People LLC (STOP) presents VeriTracks™, an innovative public safety solution designed to significantly reduce criminal recidivism. This revolutionary data integration tool combines Global Positioning Satellite (GPS) offender tracking technology with current criminal incident data reported to local law enforcement agencies. This solution provides a ground-breaking approach to community supervision and public safety.

VeriTracks™ strikes a unique balance among offender accountability, community protection and offender rehabilitation through behavior modification. VeriTracks™ can be used with both BluTag® and CellTag® allowing customized offender supervision based on community risk factors. Seamless data integration provides a cost-effective single software platform solution, which automatically identifies and reports the correlation of a tracked offender at or near the scene of a crime. VeriTracks™ enhances crime analysis, crime mapping, records management and information sharing across jurisdictional boundaries.

VeriTracks™ Vision

First and foremost, VeriTracks™ is a technology tool for the criminal justice community. We provide the latest technology for customer programs who desire to improve their offender supervision capabilities and reduce recidivism by intensely monitoring offenders and sharing data among correctional and law enforcement agencies.

We take pride in our ability to assist in program evaluation and offer a custom designed blend of existing program options incorporating the latest in GPS tracking technology at competitive pricing.

VeriTracks™ Goals

- > Provide correctional and law enforcement agencies a tool, for effective 24/7 offender monitoring, fighting recidivism, sharing data, and enhancing the effectiveness of criminal justice agencies.
- > Help our customers succeed by making the needed support and services available to those customers that want more than just a tracking device.

VeriTracks™ ... An Innovative Public Safety Solution

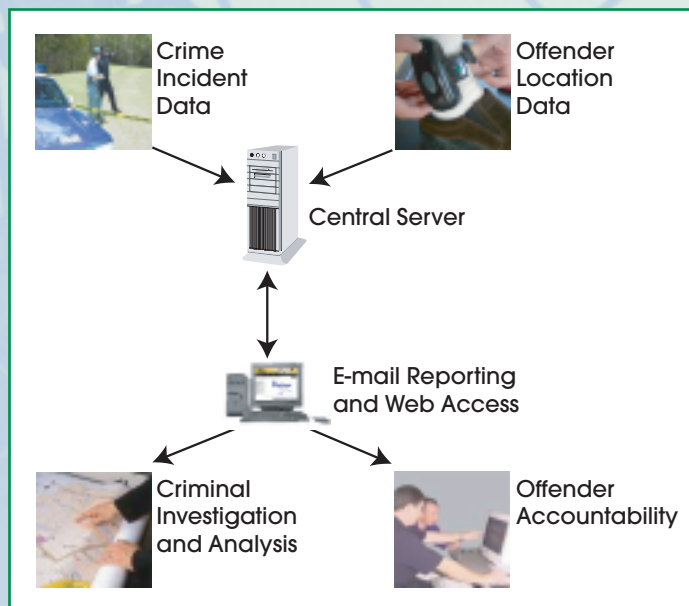

VeriTracks™ is designed to significantly reduce criminal recidivism of offenders on community supervision. For those individuals that decide to commit another crime, the VeriTracks™ solution provides a powerful crime analysis tool, significantly streamlining investigation of criminal offenses. The data sharing across jurisdictional boundaries enables local law enforcement to catch re-offenders the first time they commit a crime.

The VeriTracks™ solution is an integration platform designed to tie together tools and data needed to meet the needs of the criminal justice community. We understand that you may need different tracking device options to meet the varying needs of your supervised community. STOP's product offerings allow you to customize your offender monitoring program to best meet your needs.

STOP Values

We are committed to provide the most advanced technology for GPS tracking and monitoring of offenders. We also know tracking alone is not enough. Our customers not only need the most advanced tracking technologies but also advanced analysis tools and superior services.

STOP's staff consists of highly qualified professionals in the fields of technology, criminal justice and offender supervision. We are confident we can provide your agency with a combination of expertise, dedication and professionalism necessary to meet your needs.

VeriTracks™ Testimonial

"Florida's VeriTracks™ project has successfully demonstrated that the use of the global positing satellite system combined with automated crime mapping provides law enforcement, corrections and other criminal justice agencies with an effective means to deter, detect and prevent criminal activity... respected leaders throughout the criminal justice system are impressed by the technological applications of the VeriTracks™ Program and advocate the expansion and scope of the program."
