New efficacy data for DuPont™ RelyOn™ antiseptics and disinfectants

DuPont™ RelyOn™ antiseptics and disinfectants are now proven to be effective against a greater number of viruses and infections encountered by first responders and healthcare workers. For example, all sprays, wipes, powders and tablets are efficacious against Hepatitis A, B, and C, and MRSA.

RelyOn™ antiseptic products are formulated for use on hands, while RelyOn™ disinfectant products provide effective broad spectrum disinfection of hard, non-porous surfaces.

Norovirus

RelyOn™ Multi-Purpose Disinfectant Cleaner helps protect the public and responders by reducing surface contamination from Norovirus which may be found in areas where a large number of people congregate—cruise ships, schools, tour buses and the military.

Respirators

RelyOn™ disinfectant sprays, wipes, and powders provide an effective way to disinfect respirator face plates that are used by first responders on a daily basis.

Manikins

First responders may sanitize training CPR manikins between usage in just 30 seconds using a 3% solution of RelyOn™ Multi-Purpose Disinfectant Cleaner made from convenient tablets dissolved in water.
Now the entire line of DuPont™ RelyOn™ antiseptic and disinfectant products have demonstrated efficacy against:

**MRSA and VRE**

RelyOn™ antiseptic sprays and wipes and disinfectant sprays, wipes, powders, and tablets are effective against MRSA and VRE which are found where people are in close contact in areas such as hospitals, schools and gyms.

**Hepatitis A, B and C**

RelyOn™ sprays, wipes, powders and tablets are effective against Hepatitis A, B and C, which can be found in situations that are faced daily by first responders and healthcare workers. Responders who risk potential exposure to Hepatitis A, B or C virus can use RelyOn™ products to help reduce the spread of these germs. RelyOn™ antiseptics reduce these germs on hands, and the disinfectant products kill Hepatitis viruses on pre-cleaned environmental surfaces.

DuPont™ RelyOn™ antiseptic hand wipes, disinfectant sprays and wipes and multi-purpose disinfectant cleaner are available in a variety of sizes. Always read and follow label instructions for product use.
