

TOUR TRAX

In the Guarding Industry, harsh conditions, and user initiated damage are significant factors affecting the reliability of Tour Verification & Reporting Systems.....

TourTrax PES Wand with Anti-Vandal® Technology

Anti-Vandal Technology is a unique self-protection system that has been invented to equip this robust Data Collection device with Intelligent ant-sabotage protection.

PES contains Self monitoring features and will record all attempts to sabotage the device;

Blunt Force—Detects 3 levels of hit intensity: small, medium & strong hit.

The device is engineered to with stand a force of 10Gs.

Electrical Sabotage—Detects any attempt to sabotage the wand by inducing a voltage surge.

The device is engineered to with stand over 240V.

Intentional short circuit—Detects any attempt to discharge the internal lithium battery by short circuiting the wand.

The device is engineered to with stand short circuit attempts.

Microwave sabotage—Detects any attempt to destroy the wand by placing in a microwave oven.

The device is engineered to with stand microwave radiation.

Engineered for Zero Down Time.

TourTrax PES Wand provides for reliable, efficient Data Collection
Engineered for Zero Down time.....
Industry Leading 5 Year Warranty

Physical Traits	Stainless steel reading head. Milled Steel Body. Hermetically sealed.
Dimensions	90mm X 18mm (3.5" X .70").
Weight	44g (1.5oz)
Memory	64 Kb non volatile
Capacity	5000 readings according to configuration
Working temperatures Advanced	-20° to 75° C (-4° to 67° F)
Water Resistance	Sealed unit is Waterproof.
Power Source	Sealed Lithium Cell 6 + Year Life Span
Communication Transfer Rate	15200bps. Complete memory transfer in under 7 seconds
Signal	Sound and LED
