

Gate Solutions Designed for the Correctional Industry

DETENTION SECURITY

Securing America's Prisons, Courthouses, Jails & Sheriff Facilities

3100 Slide Gate System

www.tymetal.com

Tymetal Corp. is one of the nation's premier manufacturers of pedestrian and vehicle sallyport locking gate systems for the detention industry. For over 25 years Tymetal has continued to offer the highest quality integrated systems to fill the needs of the most discerning architects, detention facility directors and security consultants. Tymetal's own certified manufacturing process assures reliable performance of every locking gate system installed in prisons, courthouses, jails, police and sheriff facilities. We are proud of our record, as a problem solving company and a specialty manufacturer of complete systems that are delivered to the site ready to be installed as the solution to security needs. Choose with confidence, Tymetal products meet Federal Bureau of Prison design guidelines and are approved by most state and county governments. On time, first time, we out perform the competition and you can count on that. One Company, One Call, Tymetal Corp.

Correctional Market Segment and Services

Pedestrian Slide and Swing Gate Systems

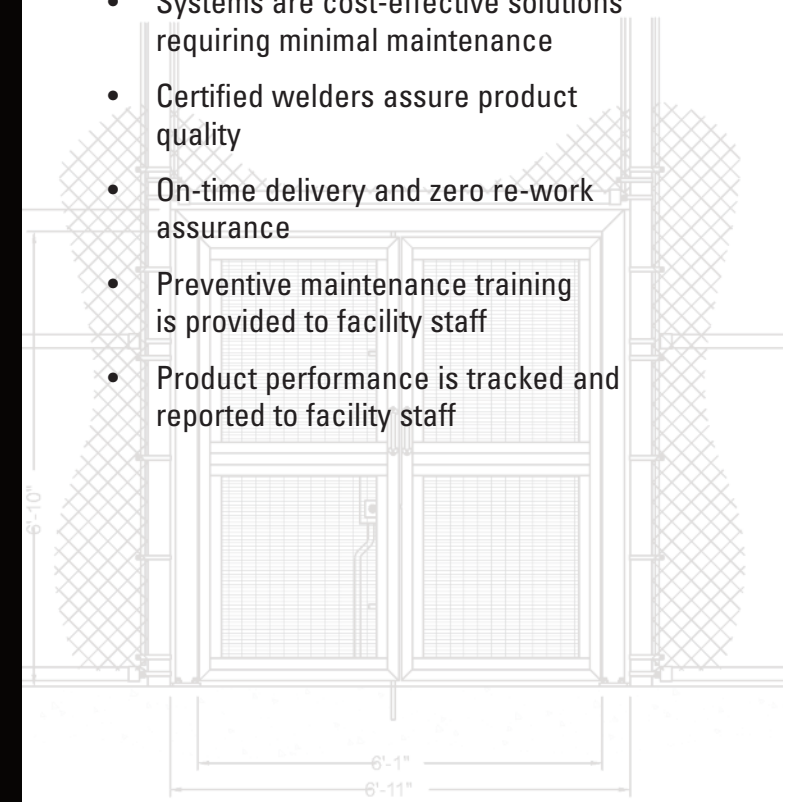

Vehicle Sallyport Gate Systems

Court House, Jail and Sheriff Facilities

Leading the Industry

- Pre-design, engineering CAD and specification development
- Systems are cost-effective solutions requiring minimal maintenance
- Certified welders assure product quality
- On-time delivery and zero re-work assurance
- Preventive maintenance training is provided to facility staff
- Product performance is tracked and reported to facility staff

Correctional Market Segments and Services

Market Segments

- Correctional Facilities
- Courthouses
- Jails
- Police Stations
- Sheriff Facilities
- Mental Health Facilities
- Juvenile Detention Centers

Louvered Tiger Gate System

PLUS Locking System in First Defence (Fence) System

Full Service and Product Offerings

Invest in New or Renewed with Confidence

All Tymetal Corp. pedestrian and vehicle sallyport locking gate systems are designed for today's performance and tomorrow's technologies. Using the most technologically advanced components today our gates provide years of reliable performance. For good measure, every system is designed to assure an easy component upgrade to minimize costs and extend the life of your investment.

Tymetal Corp. offers personalized product and service for pre-design, installation and post installation to assure long lasting value with each of our product offerings.

- Pre-design
- Full engineering staff assists with all gate system design needs
 - CAD department develops project specific details
 - Specification development staff provides project specific CSI format standards

- Installation
- Tymetal electrical division assists with PLC and control integration
 - Nationwide certified installation contractors
 - Factory technical staff assistance offered throughout the installation process

- Post Installation
- Factory field representatives inspect installation(s) prior to owner acceptance
 - Ongoing preventative maintenance monitoring to assure long term product performance
 - Onsite equipment training is available
 - Tymetal offers preventative maintenance service contracts

Trade-up Trade-out

Component Upgrades are the Finest Available Anywhere

- Latest technology and operator components
- No costly tear downs and re-installation
- Free maintenance analysis and upgrade recommendations
- In stock parts for quick-shipping

- PLUS Security Gates
- 225 CF Gate Operators
- Access Controls
- 2150 Pedestrian Swing Gates
- 3100 Pedestrian Slide Gates
- Vertical Lift Gates

Complete Gate and Operator Retro-Fit Programs

Available for All Major Brands

- Pre-Design Consultation
- Nationwide Distribution and Installation
- Preventative Maintenance Programs
- Complete Integrated Turnkey Service
- Operator, Lock and Tailored Access Control
- Toll Free 800 phone number for product support

On Site Field Training

www.tymetal.com

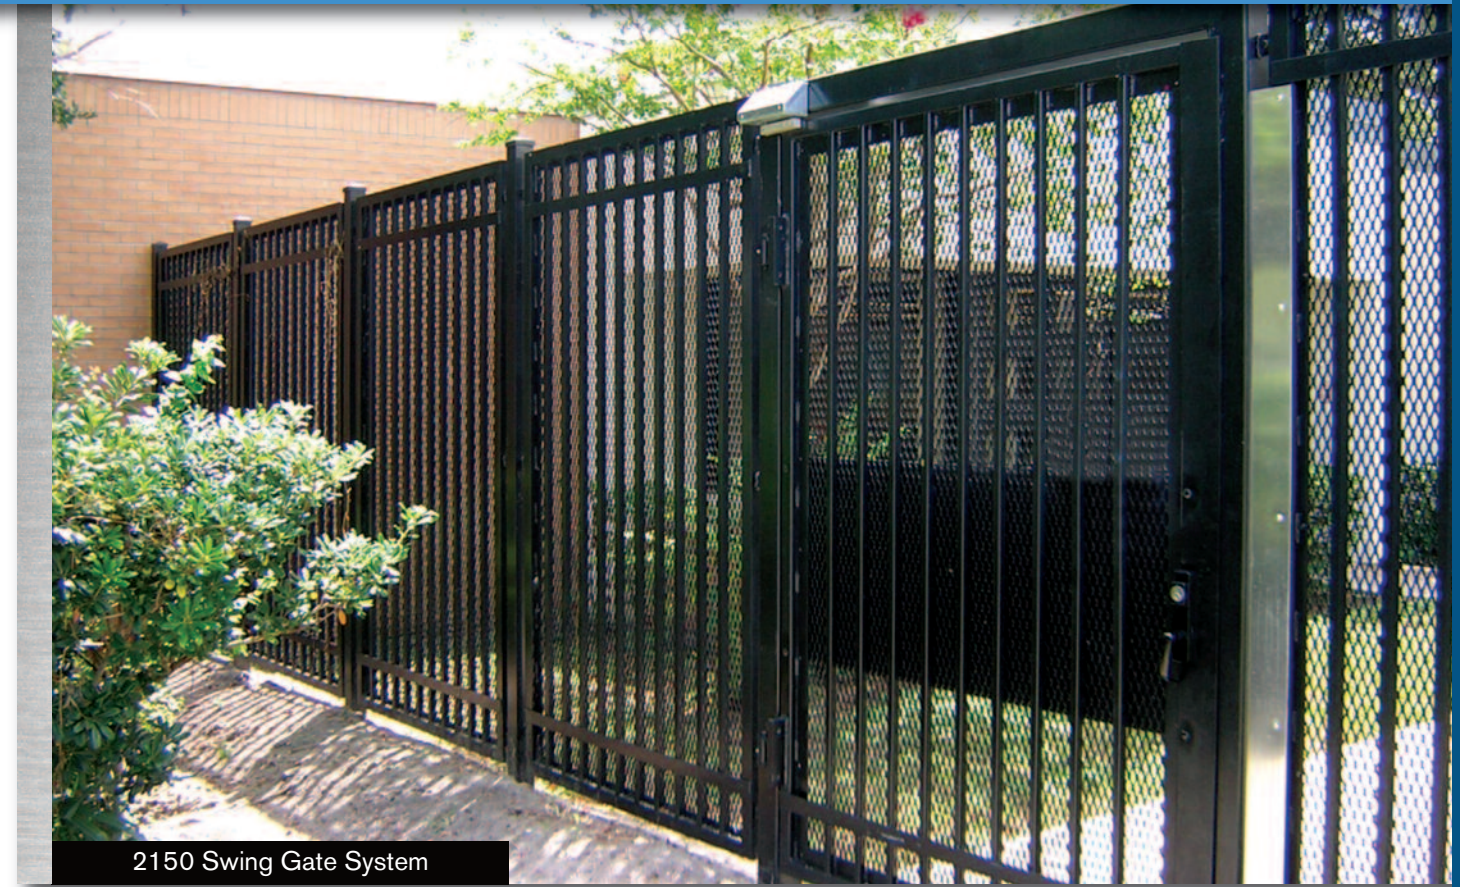

Tymetal Corp. has manufactured vehicle sallyport and pedestrian locking systems for over 25 years. All of our locking devices are designed specifically for the correctional industry and have been installed in thousands of correctional facilities worldwide.

Pedestrian Slide and Swing Gate Systems

2150 Swing

Virtually maintenance free! Systems are fully assembled at the factory and shipped to the project site ready for installation.

- **Lockable** Controlled swing motion assures continual lock alignment
- **Secure** No gaps between gate and adjacent fence reducing contraband issues
- **Durable** Highly resistant to inclement weather conditions
- **Accessible** Keying from one or both sides of the gate
- **Reliable** Hundreds of installations throughout the industry with a long reference list
- **Flexible** Includes several lock options, cuff or shackle ports and a variety of access control options
- **Infill** Options include weld mesh, chain link, woven wire or solid panel
- **Rugged** Heavy hot-dip galvanized 4" x 4" super structure resists expansion/contraction due to weather changes and provides for proper lock alignment

3100 Slide

Discerning correctional officers and facility maintenance staff attest that the 3100 sliding gate system operates in a smooth, consistent manner. Practically maintenance free, the 3100 is the industry's choice for safe-guarding facility operational costs and personnel movement.

- **Lockable** Internal mechanical locking system positively locks gate panel in both open and closed positions
- **Engineered** Manufactured, assembled and tested at our factory prior to shipment
- **Secure** Drive and locking assemblies properly function in all weather conditions
- **Durable** Superstructure is vandal proof and tamper resistant
- **Accessible** Manual release keying from one or both sides of the gate
- **Flexible** Offerings include a variety of access control options (cameras, intercoms, speakers)

Vehicle Sallyport Gate Systems

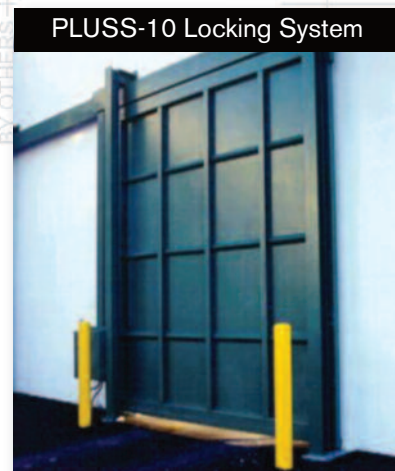

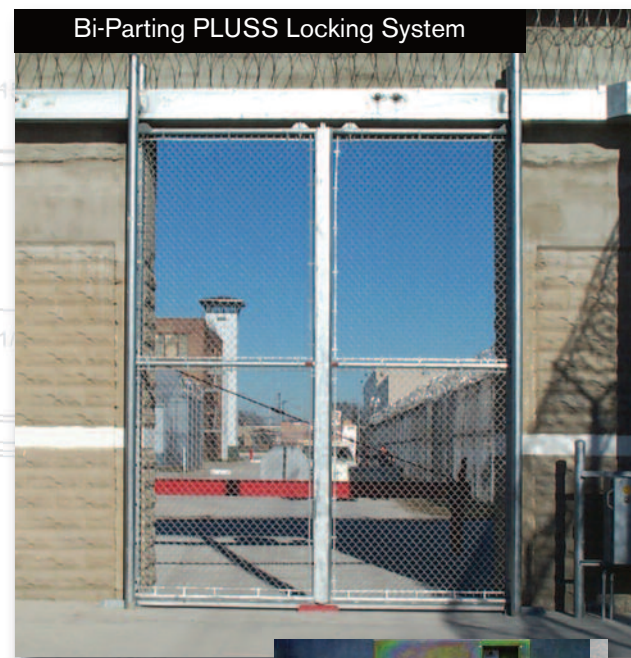

PLUSS Series

PLUSS sallyport locking systems are specifically designed for the correctional industry. New models include features that facility security and maintenance staffs require to maximize security and minimize system maintenance. Systems are ideal for medium to maximum security requirements.

- **Secure** Galvanized steel enclosure protects both the drive and locking assemblies
- **Lockable** Keyless, positive three point mechanical locking systems
- **Complete** Fully integrated systems
- **Durable** Highly resistant to inclement weather conditions
- **Accessible** Ground mounted motor assembly with manual emergency hand crank
- **Versatile** Programmable high speed controller and access control options
- **Reliable** Over 25 years of installed products fully operational and in use today

System Options

- **Standard PLUSS** Openings up to 30'
- **Bi-Parting PLUSS** Openings up to 24'
- **PLUSS-10** Openings up to 30'
- **Manual Crank PLUSS** Openings up to 30'
- **Stacking PLUSS** Openings up to 50'

Vertical Lift Gates

Tymetal's Fortress Vertical Lift Gate is specified for installations of high usage. The heavy construction of the superstructure, combined with a drive chain mechanism, lifts the gate open and pulls the gate closed.

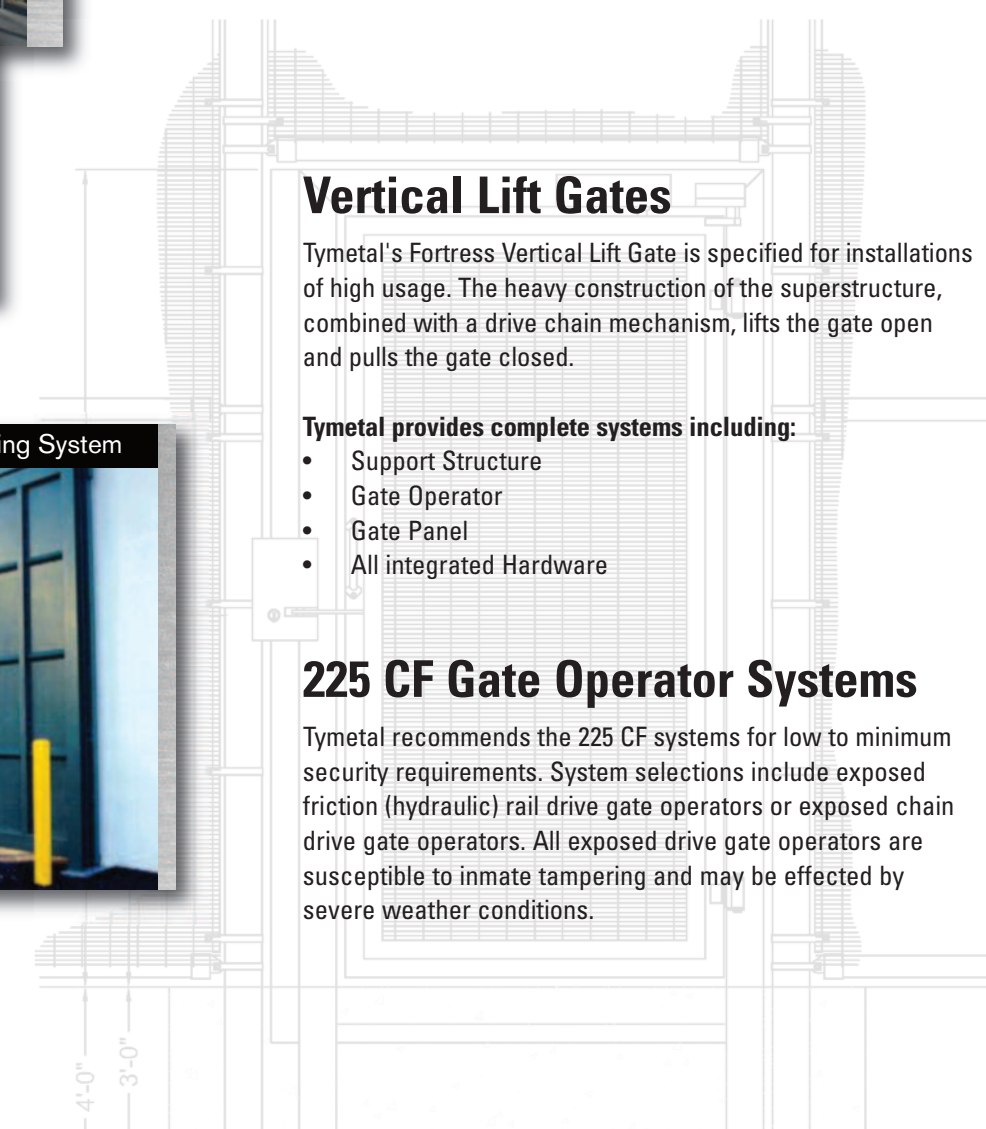

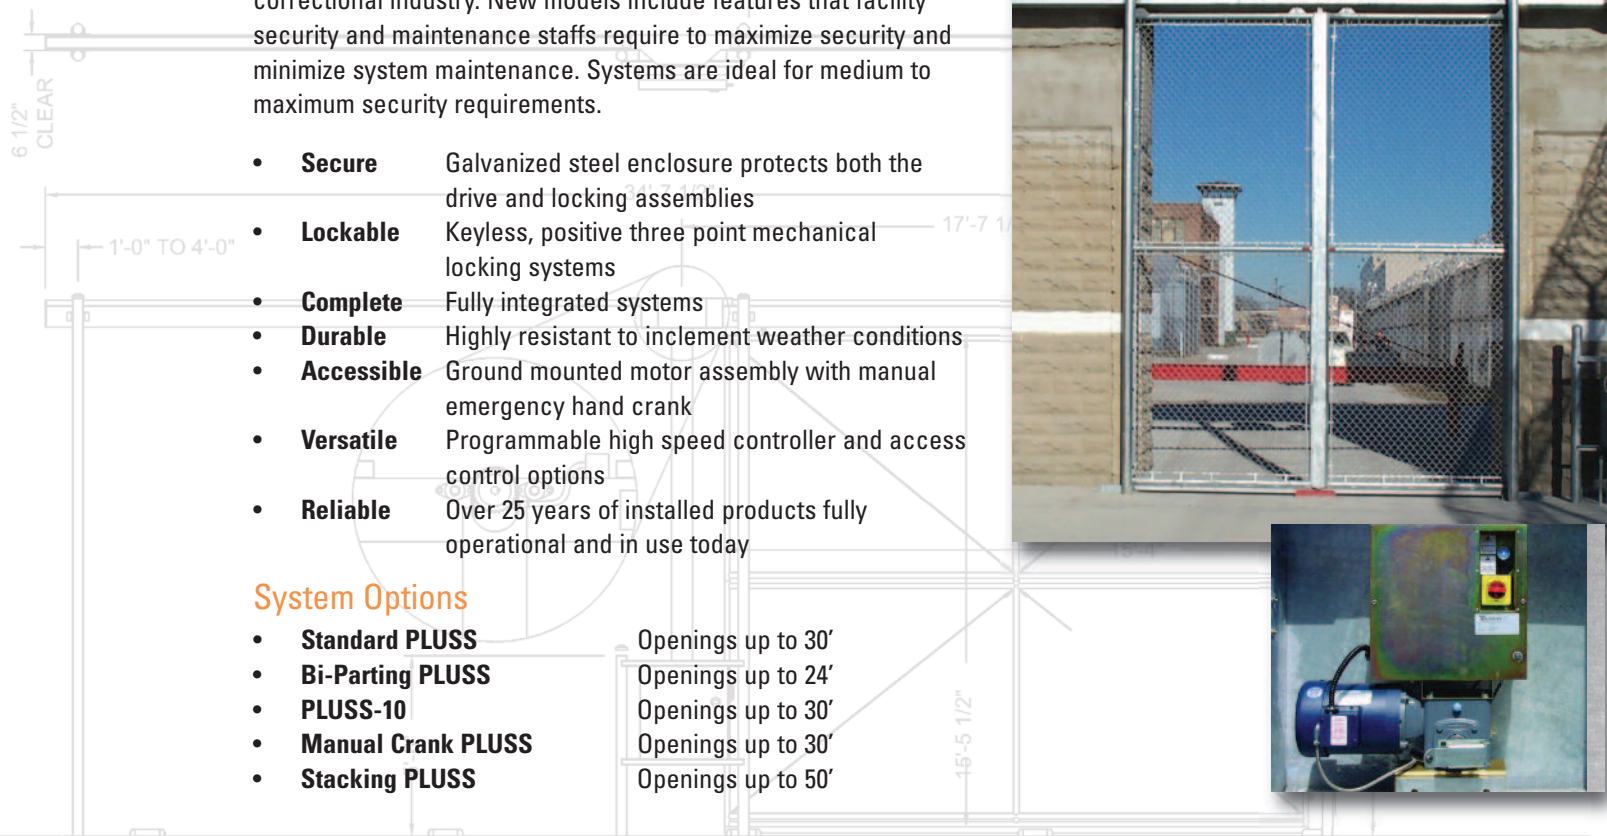

Tymetal provides complete systems including:

- Support Structure
- Gate Operator
- Gate Panel
- All integrated Hardware

225 CF Gate Operator Systems

Tymetal recommends the 225 CF systems for low to minimum security requirements. System selections include exposed friction (hydraulic) rail drive gate operators or exposed chain drive gate operators. All exposed drive gate operators are susceptible to inmate tampering and may be effected by severe weather conditions.

Court House, Jail and Sheriff Facilities

Tymetal Corp. specializes in the manufacturing of vehicle and pedestrian gate locking systems designed for Jails, Police Stations and Sheriff Facilities. Tymetal Corp. provides reliable, transparent and aesthetically pleasing protection for judicial parking and prisoner delivery entrances:

"Triad" Design for Complete System Satisfaction

- Implements owner's security requirements
- Adds design professional's product selections
- Includes manufacturer's technical input to assure complete system functionality

Long Term Service Support

- Our service representatives prepare and maintain a confidential file on all installations and customize follow-up services with our customers to assure long term satisfaction

Vehicle Gate Operating Systems

- Vehicle gate locking systems are specifically designed to secure prisoners of all security levels
